SUMMARY

Full-Stack Software Engineer specializing in production voice AI: LLM-based conversational agents, real-time Speech-to-Text and Text-to-Speech pipelines, and low-latency voice infrastructure on LiveKit. Build reliable end-to-end systems with Next.js, Python, and FastAPI, working directly with enterprise clients across the Middle East and Europe to take products from requirements to production at scale.

EXPERIENCE

Software Engineer, Convoi AI

Aug 2025 to Present

- Build full-stack voice AI systems end to end, with Next.js frontends and Python/FastAPI backends powering real-time conversational agents in production.
- Develop LLM-based agents with streaming Speech-to-Text and Text-to-Speech pipelines and low-latency voice infrastructure on LiveKit, including turn-taking, tool calling, and multi-agent orchestration.
- Shipped a production voice agent for Invygo, a UAE car-rental platform, handling multilingual Arabic and English booking and payment flows.
- Delivered voice agents for enterprise clients across KSA, UAE, and Germany, including Pepsi (Aquafina) and Dubai healthcare providers, collectively handling 50,000+ conversations for 10,000+ users.
- Engineer for production reliability: low latency, grounding to prevent the agent from inventing prices or facts, natural dialect handling, and dependable tool calling.

Software Engineer Intern, ETL Online

Apr 2025 to Jun 2025

- Built and maintained Next.js frontend pages for ETL Online, Pakistan's largest non-profit tech community.
- Developed Node.js and Express REST APIs powering core platform features for a live product serving 2,300+ members nationwide.

PROJECTS

Convoi AI Voice Platform

go.convoi.ai

Production platform where teams build, launch, and monitor AI phone agents that make and take real calls. Built the dashboard and the services behind it: campaign orchestration, live transcription over LiveKit, call analytics, knowledge bases, phone number provisioning, and Stripe billing.

Tech: Next.js, TypeScript, TanStack Query, Python, FastAPI, LiveKit, Stripe, PostgreSQL

Convoi AI Admin CMS

Internal tool

Internal admin platform for client accounts, subscriptions, billing and credits, voice providers, API keys, and model configuration, with role-based access control, call analytics, and system logs.

Tech: Next.js, TypeScript, TanStack Query, Python, FastAPI, PostgreSQL

Convoi AI Website & Developer Docs

convoi.ai

Public marketing site and developer documentation for the voice-agent platform. Built a live in-browser voice demo over LiveKit WebRTC, letting prospects talk to the AI agent from the homepage instead of booking a call, and shipped an interactive API reference generated from the OpenAPI spec.

Tech: Next.js, React, TypeScript, Tailwind CSS, LiveKit, OpenAPI

SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, SQL

Frontend: Next.js, React, TypeScript, Tailwind CSS, Zustand, TanStack Query

Backend & APIs: FastAPI, Node.js, Express.js, REST APIs, WebSockets, Stripe, PostgreSQL

AI / Voice: LiveKit, Twilio, LLM Integration, Speech-to-Text, Text-to-Speech, Prompt Engineering, Conversational AI

DevOps & Tools: Git, GitHub, Vercel, Sentry, Cursor, Claude Code

EDUCATION

BS in Computer Science, Information Technology University

2020 to 2024

Lahore, Pakistan

Languages: English (professional), Urdu (native)
